

Enabling Research

Research Computing

Mission Statement

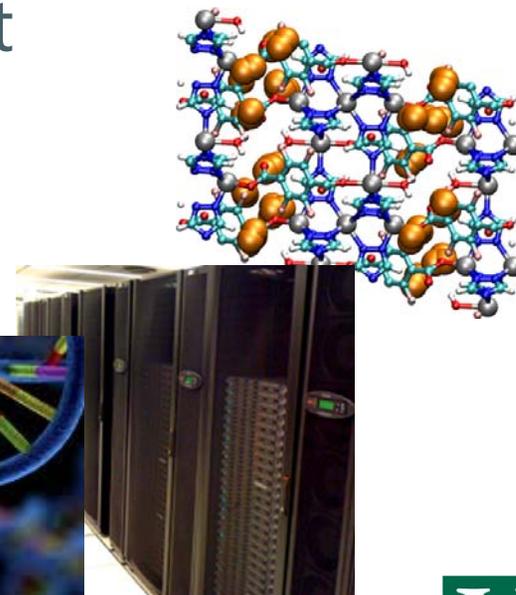

- To support USF faculty and students in their efforts to do transformational research through the availability of advanced technologies and computational expertise.

Research Facilitators

- Help research faculty or students leverage advanced technology
- It's not just the technology, it's the people
- Computational scientist
- Visualization expert
- Student research facilitator program

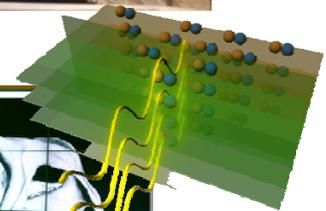

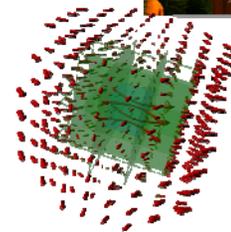

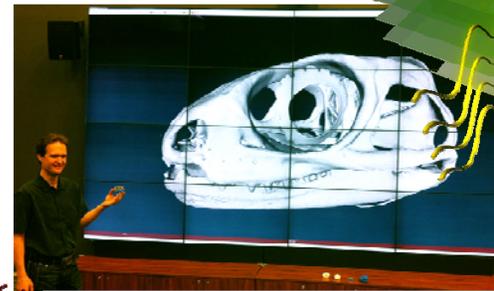

Resources

- Research Computing
 - High Performance and High Throughput Computing
 - Data management support

Resources

- Advanced Visualization Center
 - Visualization
 - 3D printing
 - 3D scanners
 - Specialty cameras
 - Virtual reality
 - Augmented reality
 - Visualization computer lab

New Initiatives

- High speed data transfer node (DTN)
- Large research data storage
- Health library extension of the AVC
- Redcap – FISMA compliant cloud resource
- HIPAA compliant HPC/HTC environment

New Initiatives

- Brokered cloud services:
 - Machine learning/Artificial intelligence
 - Specialized SAAS platforms
 - Calculation bursting
- Internet of things (IOT) laboratory
- 3D web viewer
